

Employee of the Month
February 2005

Dianne Dripps – Technology Department

The selection committee respectfully requests that Dianne Dripps of the Technology Department of Pulaski County Public Schools be named as Employee of the Month for February 2005. Dianne has been employee of Pulaski County Public Schools for over six (6) years. As a dedicated member of the technology team, Dianne is currently their Senior Technician. Ms. Dripps has an Associate's Degree in Computer Information Systems from New River Community College.

Ms. Dripps was nominated by her supervisor and colleagues. Not only does Dianne do an outstanding job of supervising the technicians in our system, she also manages the software licensing for the division and negotiates purchases and warranties with many vendors. She successfully secures the best pricing and warranty coverage for all our technology equipment and products. One of Dianne's finest accomplishments this year has been her role in the researching, purchasing, and installation of the large number of technology products at Pulaski Elementary School. She and her crew of technicians worked many long hours to prepare for the opening of our newest school. Her strong work ethic and dedication are stellar examples of the quality of employees that we have in Pulaski County Public Schools.

Dianne's contributions to Pulaski County Public School's students, staff and parents, as well as to her profession, reflect great credit on her and the Pulaski County Public Schools.
